(ZHONGGUO DIQIU KEXUE PINGLUN)
2024 年 第 3 卷 第 4 期

目 次

成矿作用在岩浆热液活动演化过程中的时空关联性分析	赵永鑫,杨 虎,陈家其,等(169)
西藏堆龙德庆区泥石流发育特征及孕灾地质条件分析	周 鹏,万忠焱,李 强,等(177)
滇黔桂盆地东北缘特殊浅水环境下形成的下石炭统——以环江孟洞剖面为例	于新武,张英杰,岑文攀,等(185)
华南早奥陶世微生物礁中的凝块石:以宜昌黄花场剖面为例	唐浩博(196)
西藏阿里札达县中、晚三叠世双壳类化石特征及地质意义	黄云川,丹真次旦,赵永鑫,等(207)

CHINESE EARTH SCIENCES REVIEW

Vol. 3, No. 4 December, 2024

Contents

Temporal and spatial correlation analysis of mineralization during magmatic hydrothermal activity evolution	ZHAO Yongxin, YANG Hu, CHEN Jiaqi, et al. (176)
Analysis on the development characteristics and geological conditions of debris flow in Duilong Deqing District, Xizang	ZHOU Peng, WAN Zhongyan, LI Qiang, et al. (184)
The Lower Carboniferous formed in the special shallow-water environment at the northeast margin of the Dianqiangui Basin; a case study from the Mengdong section of the Huanjiang	YU Xinwu, ZHANG Yingjie, CEN Wenpan, et al. (194)
Thrombolite in Early Ordovician microbial reef, South China; A case study of the Huanghuachang section in Yichang	TANG Haobo (206)
Characteristics and geological significance of Middle and Late Triassic Bivalve Fossils in Ali Zada County, Tibet	HUANG Yunchuan, DAN Zhencidan, ZHAO Yongxin, et al. (214)
